# How to transfer your individual repository to our organisation repository

You can read official instruction from here: https://docs.github.com/en/repositories/creating-and-managing-repositories/transferring-a-repository

Here are my personal example for our group:

1. On GitHub.com, navigate to the main page of the repository. For example, **ERJ-SNF** under username of *chuanxingli*
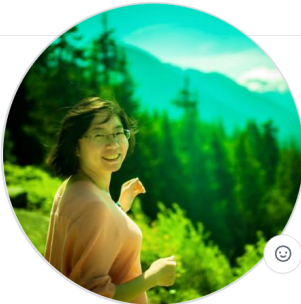

Search or jump to...    Pull requests   Issues   Codespaces   Marketplace   Explore    🔔   ➕▾   ▾

📖 Overview    Repositories 6    ⊞ Projects    📦 Packages    ⭐ Stars

## Popular repositories

Customize your pins

### ERJ_SNF    Public

The codes for "Integration of multi-omics datasets enables molecular classification of COPD" published on ERJ, Jan 2018.

🔴 HTML

### pages    Public

### test    Public

### mirna.github.io    Public

🔴 HTML

### recipe    Public

Test repo for Git workshop

### ccml    Public

🔵 R

### Releases

No releases published

Create a new release

2. Under your repository name, click **Settings**.

3. Under "Danger Zone" (At the bottom of **Settings**), click **Transfer**.

4. Read the information about transferring a repository, then type the name of the user or organization you'd like to transfer ownership of the repository to. For our group,

username is **pulmonomics-lab.**

5. Type the name of the repository you'd like to transfer, then click **I understand, transfer this repository**.

*After transferred, you can still use your previous git APP to update the repository as what you have done before.*
